

Work Experience

LogixHealth / Senior UI Developer (Remote)

April 2018 – present Bedford, Massachusetts

- Develop user-centered healthcare applications that streamline workflows and ensure usability through testing and iteration, focusing on intuitive interfaces for medical data visualization.
- Identify and resolve potential user pain points through UX/UI walkthroughs, enhancing the intuitiveness and efficiency of the user experience.
- Collaborate with product managers and designers to translate user stories into user-friendly, visually appealing UI designs.
- Effectively manage remote direct reports, fostering a productive environment for successful project delivery.
- Lead and manage sprints using PBIs for on-time delivery of projects.
- Leverage Git to document the codebase, conduct code reviews, and ensure maintainability and brand consistency.
- Provide ongoing mentorship to development and brand teams, ensuring flawless design implementation and adherence to quality standards.

ZOLL Medical Corporation / Web Developer

February 2016 – April 2018 Chelmsford, Massachusetts

- Led the development of ZOLL's multi-language web presence across 12 websites, microsites, and global iPad apps.
- Created engaging email campaigns and landing pages using HubL syntax.
- Developed and maintained ZOLL's social media presence.
- Designed and created demos, web animations, and interactive tools.
- Troubleshoot solutions to enhance website functionality.
- Provided ongoing HubSpot and Sitecore support and training to staff.

The Coastal Shopper & News / Graphic Designer

February 2015 – October 2015 St. Mary's, Georgia

- Designed and developed online and print materials, translating client concepts into visually compelling deliverables.
- Utilized QuarkXPress to manage weekly page layout and design.
- Launched internet marketing packages, establishing clients' online presences.
- Created and maintained engaging graphic design content for websites and social media, driving user engagement.

J Green & Co Jewelers / IT Manager

March 2013 – January 2015 Waycross, Georgia

- Managed the entire lifecycle of the company website, from design and development to ongoing maintenance.
- Provided support to multiple branch offices, troubleshooting website issues.
- Promoted company offerings through social media strategy and content creation.
- Developed a CMS for employee-driven content updates.
